87.6 %

EXPERIENCE

Defence Research And Development Organisation
[Research Intern \(Scientific Analysis Group\)](#)

June 2023 - July 2023

- Designed and developed backend data pipelines using Python and Flask to automate large-scale data extraction and processing.
- Built RESTful APIs to serve structured and unstructured data for internal analytical tools.
- Implemented web scraping systems using Selenium and BeautifulSoup with error handling, logging, and performance optimization.
- Integrated NLP and machine learning models for text preprocessing, classification, and trend analysis.

SKILLS

Programming Languages : C , C++ , Java , Python , JavaScript , TypeScript

Frontend Development : HTML , CSS , , JavaScript , React , Next.js

Backend Development : Flask , RESTful API Design , Authentication & Authorization , Backend System Design

Database Management : MySQL , PostgreSQL , Database Schema Design

Cloud & DevOps : AWS , GCP , Deployment using Flask & Vercel

Tools : Git , Linux , Selenium , BeautifulSoup

AI & Machine Learning : Machine Learning Fundamentals , CNNs , NLP , Generative AI-assisted Development

Software Engineering & CS Fundamentals: Data Structures & Algorithms , OOPS Programming , OS Fundamentals

ACHIEVEMENTS

1st Runner Up ([Eonverse Hackathon](#))

1st Runner-Up – Eonverse Hackathon for building a full-stack web platform using modern web technologies.

PROJECTS

[FACE RECOGNIZED STUDENT DATABASE SYSTEM](#)

- Developed a full-stack web application using HTML, CSS, JavaScript, Flask, and MySQL.
- Designed and implemented RESTful APIs for user authentication, attendance management, and course handling.
- Integrated real-time face recognition using face-api.js with secure authentication and authorization flows.
- Designed normalized database schemas and optimized queries for performance and data integrity.
- Built responsive dashboards and dynamic UI components for administrators and users.

[INTELLIGENT WEB SCRAPING & RESEARCH AUTOMATION PLATFORM](#)

- Built a scalable backend system using Flask and REST APIs for automated content extraction.
- Implemented multi-threaded scraping pipelines for performance optimization.
- Integrated NLP-based summarization, topic modeling, and relevance scoring using external AI APIs.
- Designed modular backend architecture to support future feature expansion and POC validation

CERTIFICATION

[Introduction To Database Management System](#)

Issued By NPTEL

[Introduction To Modern AI](#)

Issued By CISCO

[Machine Learning Fundamentals](#)

Issued By ALTERYX

[Oracle Certified Foundations Associate](#)

Issued By ORACLE

[Introduction To Machine Learning](#)

Issued By NPTEL
